SUMMARY

Full-stack developer with 6.5+ years of full-stack development experience, including 4 years delivering and supporting high-availability (24/7) government digital services. Proficient in React.js, Next.js, and Node.js (Express.js), with earlier professional experience in Laravel and WordPress, and database experience across Oracle, MongoDB, and PostgreSQL. Applied QA-minded delivery practices including test planning, regression testing, and code review. Built an AI-assisted B2B platform integrating Amazon Bedrock to accelerate agreement drafting workflows. Currently pursuing a Master of Information Technology at the University of Auckland (Expected 2027).

TECHNICAL SKILLS

Frontend: React.js, Next.js, Tailwind CSS, Vite
Backend: Node.js, Express.js, Socket.IO, PHP (Laravel)
Databases: Oracle, MongoDB, PostgreSQL, MariaDB
QA and Delivery: Test planning, regression testing, code review, incident triage, root-cause analysis, production support (24/7)
AI Tools: Claude Code, GitHub Copilot, Cursor.

PROFESSIONAL EXPERIENCE

Software Developer

May 2022 - Feb 2026

Ministry of Agrarian and Spatial Planning / National Land Agency

Indonesia

- Delivered and maintained modules for Indonesia's Electronic Land Certificate platform, a secure large-scale government digital service with 24/7 availability requirements.
- Built and maintained full-stack features and services, translating policy and operational requirements into reliable digital workflows in close collaboration with stakeholders.
- Developed and optimised Oracle SQL queries and data workflows to improve performance, reliability, and data integrity in production environments.
- Supported 24/7 service reliability through incident triage, root-cause analysis, and cross-team coordination to restore service and prevent recurrence.
- Applied QA-minded delivery practices including test planning, regression testing, and code review to reduce release risk and improve software quality.
- Used LLM tools to accelerate debugging, documentation, and test case drafting, with manual validation aligned to government security and compliance requirements.

Web Developer

2019 - 2022

Sarana Solusindo Informatika

Indonesia

- Built and maintained internal company web applications and business tools using Laravel, tailored to operational requirements across departments.
- Developed and maintained WordPress-based sites, working directly with stakeholders to translate business needs into functioning web tools.

PROJECTS

HoneyBee - B2B Commerce Platform with AI-Assisted Trade Agreement Generation

Live demo: <https://hb-web-psi.vercel.app/> | Admin: <https://hb-admin-fe.vercel.app/login>

- Built a full-stack B2B platform with two separate frontends: a customer-facing site (Next.js + Tailwind CSS) and a supplier/admin portal (React + Vite + Tailwind CSS).
- Implemented backend services using Node.js (Express) with Socket.IO for real-time workflow updates and multi-user collaboration.
- Integrated Amazon Bedrock to generate first-draft trade agreements from structured inputs, enabling inline user review and iterative refinement.
- Designed MongoDB data models to persist users, products, deals, agreement versions, and workflow states across sessions.

Interactive Maps - University of Auckland (Full-Stack Web App)

- Developed an interactive maps-style web experience using React and Tailwind CSS with an Express API and MongoDB for data management.
- Implemented search and filtering functionality with interactive UI components for location discovery and detail views.

UoA Bingo (Full-Stack Web App)

- Built a lightweight interactive web application using React and Tailwind CSS with an Express backend and MongoDB for session and state persistence.
- Implemented dynamic board generation and real-time state updates to support repeatable gameplay sessions.

EDUCATION

Master of Information Technology

University of Auckland

Expected 2027
New Zealand

Bachelor of Informatics Engineering

Brawijaya University (Indonesia)

2019

ADDITIONAL

Languages: Indonesian (native), English (professional working proficiency)

Interests: Hiking, outdoor activities, sports
